

DILLON TADEO

San Jose, CA | 408-960-3850 | dmt0105@gmail.com | linkedin.com/in/dillontadeo

PROFESSIONAL SUMMARY

Economics and Mathematics graduate from the University of Southern California with extensive experience in financial planning & analysis (FP&A), variance analysis, revenue forecasting, and financial data modeling. Skilled in Python, SQL, Excel, QuickBooks, and Tableau. Proven track record in executing monthly variance reporting, building long-term forecast models, optimizing budget allocations, and transforming complex datasets into actionable executive insights.

TECHNICAL SKILLS

Programming: Python (pandas, NumPy), SQL (MySQL, PostgreSQL, MongoDB; proficient in JOINS, Aggregations, Subqueries, Window Functions), R, STATA

Analytics & FP&A: Financial Planning & Analysis (FP&A), Financial Modeling, Revenue Forecasting, Variance Analysis, Budgeting & Rolling Forecasts, Profitability Analysis, Scenario Modeling

Systems & Tools: QuickBooks, Tableau, Excel (PivotTables, XLOOKUP, VLOOKUP, INDEX-MATCH, Power Query, Financial Models), Database Management

Data Management: Data Management & Analytics, Data Cleansing, Data Normalization, Data Transformation, Data Validation, Dataset Standardization, Reporting Automation

PROFESSIONAL EXPERIENCE

Financial Analyst – Jamiez LLC

May 2025 – May 2026

- Owned monthly financial planning & analysis (FP&A) operations, including budget vs. actual (BvA) variance reporting, operating expense tracking, and driver-based revenue forecasting.
- Built three-statement financial models and scenario analysis tools in Excel and Python to evaluate quarterly performance and assess downside risks.
- Managed multi-entity general ledger data and financial reconciliations using QuickBooks, streamlining monthly closing cycles and journal entry auditing.
- Partnered with cross-functional department leads to establish annual operating budgets, KPI benchmarks, and capital allocation frameworks.
- Designed interactive Tableau financial dashboards tracking gross margins, customer acquisition costs (CAC), and run-rate velocity for senior leadership.
- Built county-level financial viability frameworks evaluating 50+ expansion targets based on market sizing, unit economics, and cost structure projections.

Operations Data Analyst – Perfect Pair Optometry

Mar 2024 – Aug 2024

- Audited Electronic Health Record (EHR) and billing databases across 500+ patient records, resolving structural discrepancies and ensuring 100% data fidelity.
- Analyzed clinic historical arrival trends and patient throughput to optimize provider schedules, increasing appointment capacity by 15%.
- Compiled daily revenue and operational performance summaries in Excel to identify bottleneck areas and present findings to clinic management.

Performance Analytics Coordinator – For The Love of Piano Studio

Mar 2021 – Present

- Designed spreadsheet tracking matrices to evaluate historical student performance metrics, milestone completion rates, and client retention trends.
- Analyzed revenue cycles and retention rates for 30+ clients to forecast seasonal enrollment drop-offs and restructure lesson pricing models.
- Transformed complex evaluation data into executive-style milestone reports and performance progress maps for key stakeholders.
- Managed accounting workflows and client billing configurations using automated spreadsheet templates and scheduling software.

TECHNICAL & FINANCIAL PROJECTS

- California Regional Market Expansion & Viability FrameworkPython, SQL, Excel, Tableau
- Programmed a modular viability framework leveraging Python pandas, multi-table SQL queries, and Excel sensitivity grids to evaluate target metrics across 50+ regions and generate strategic dashboards.
- Econometric Predictive Analysis & Statistical Inference FrameworkR, STATA, Python
- Constructed multivariate regression systems and executed diagnostic statistical tests (multicollinearity, heteroskedasticity) to mathematically validate financial and behavioral datasets.

EDUCATION

University of Southern CaliforniaLos Angeles, CA

B.S. Economics/Mathematics • Dean's List (Fall 2023 - Spring 2026)GPA: 3.77

Relevant Coursework: Financial Markets, Econometrics, Mathematical Statistics, Data Analytics, Mathematics of Machine Learning, Probability Theory, Linear Algebra, Calculus I-III
